

*The Phase 2 HIMALAYA clinical trial evaluating SAR443820/DNL788 in participants with amyotrophic lateral sclerosis (ALS) did not meet the primary endpoint of change in ALS Functional Rating Scale-Revised (ALSFRS-R). The detailed efficacy and safety results will be shared at a future scientific forum.*

*Sanofi states: "We would like to thank the ALS community for their support of the HIMALAYA trial. We extend our deep gratitude to the trial participants and their families for their commitment. While the trial was not successful, it was an important step forward in ALS research."*

*Sanofi will continue to look for opportunities to make an impact and engage within the ALS community.*
